

Bathymetric Acquisition Equipment

Multi-Beam Systems

- » Capable of sub-meter, decimeter, centimeter accuracy
- » Combined beacon, GPS, satellite differential correction antenna
- » Used in Real Time Commercial Marine Positioning
- » Coast Guard Beacon, WAAS, Omnistar Differentially Corrected
- » Dynamic Marine Positioning Tasks

Heave Compensator

- » Compute The Effects Of Heave, Pitch And Roll On The Data Acquired

Depth Recorders

- » Dual Frequency Operation-High/Low Band
- » Over the Side or Hull Mounted Transducer
- » Depth Range to 12,000 meters

Velocity Profiler

- » Water Column Velocity Determination
- » Accurate to 1.0 foot
- » Sampling by Depth or Time
